Shoebox Scans

What is Shoebox Scanning?

No longer do family members need to argue over who has the family photos. Fotofast's Shoebox Scan service is your solution. We use a special high-speed scanner to provide quality scans of your photographs. Not just one or two photographs, this service is best suited for 20 or more photos. The scanned images are then saved to CD. Your photographs are then protected from the ravages of time, weather, crayons, humidity and poor storage conditions. Additional copies of the digital files are readily available for other family members. These quality scans may be viewed on your computer, or other digital image viewers including DVD players & digital photo frames. You can also then have prints made of your photos through our easy self service photo kiosks.

Frequently Asked Questions

Do I get my pictures back?

Yes they never leave our store.

I have some enlargements, can they be scanned?

Yes, we scan wallet size to 8x12" (20x30cm).

Am I required to do anything before I bring in my shoebox of family photographs?

Yes at this low price we ask that you prepare your photos for scanning. Below is easy instructions. Ask us if you need additional information.

What can I do if some photos are scanned side-ways or out of order?

You may use any photo program on your computer to turn or sort them.

Several of my photos have priceless data written on the back.

Is there any way to scan that information?

Yes, We can scan both sides so you have that information, note this will count as two scans.

May I have titles for years or family groups?

Yes write or print the information on 6x4" (10x15cm) cards and place them before that group.

Per Scan

Extra Copies of CD/DVD

| | | | |
|-------------------|--------|-----|----------|
| 1-4 Originals | \$5.00 | CD | +\$5.00 |
| 5-9 Originals | \$4.00 | DVD | +\$10.00 |
| 10-19 Originals | \$3.00 | | |
| 20-49 Originals | \$1.50 | | |
| 50-99 Originals | \$1.00 | | |
| 100-199 Originals | 75c | | |
| 200-399 Originals | 50c | | |
| 400+ Originals | 40c | | |

How to prepare your photographs for shoebox scanning

As this is a high speed, low cost service it is important that all photographs be prepared for scanning to avoid disappointment

First Only loose photos may be scanned, therefore remove all photographs from albums & album pages. Small quantities of photos should be removed from envelopes, although you may place large quantities in envelopes after you have sorted the.

Second Make certain there is no hanging tape or sticky substance on the photographs. Remove all staples, paperclips etc., as these will damage the high-speed scanner

Third Sort pictures by size and direction. We can scan wallet size up to 8x12".

Our suggestion is that you bundle each size and direction separately. A 6x4" index card is a handy way to separate your bundles. If a picture is turned sideways or upside down it will be scanned that way.

Fourth Photographs with data on the back, which you wish to have scanned with the photograph, will need to be sorted separately and marked with a predominant note for two sided scanning. Two sided scanning counts as two scans.

Fifth Photographs must be unmounted (not on any thick backing)

Sixth By federal law we are unable to scan copyrighted images, UNLESS you have a written copyright release from the copyright holder, which is generally the photographer.

Quick Review

All Photographs are facing up? Loose Unmounted?

Sorted by size and direction? Have no paper clips, staples or sticky substance?

No photos smaller than wallet size (5x8cm) or bigger than 8x12" (20x30cm)
